Toon Materials Ltd.

Environmental Policy

Toon Materials Ltd operates from Hertfordshire and work in the South East of England.

We recognise that many of our activities impact on the environment. We are committed to achieving a high standard of environmental performance, preventing pollution and minimising the impact of our operations on the environment.

When undertaking contracts we promise to:

- Comply and where possible exceed regulatory requirements
- Take all reasonable precautions to avoid the pollution of the ground and water courses
- Control traffic movements and parking
- Minimise waste of materials, energy and water supplies
- Encourage the use of materials, from sustainable sources and reuse of materials/use of recycled materials where possible
- Provide adequate training for all employees to ensure they are aware of the company's aims and the exact means of their implementation

- Ensure the correct use of hazardous materials and disposal of waste materials/toxic substances to minimise risk of pollution
- Communicate with people local to our sites to ensure our works causes the minimum disruption
- Monitor and review the company's environmental performance and continued adherence to current/new legislation
- To identify, evaluate and seek to reduce the deleterious environmental effects associated with all company operations
- Review new techniques and materials to ascertain their suitability of use, with regard to safeguarding the environment

This statement is the basis for the management of the environmental issues surrounding our companys activities. We are committed to fulfilling our promises, to regularly review our policy and to ensure all our staff are aware of the impacts we could have on the environment.
